Show Steer Nomination Information

- A limited number (maximum of 6) steers will be accepted for the sale.
- The steers must have been calved after January 1, 2021 and prior to March 31, 2021.
- Consignment Fee is \$50.00 per calf.
- All steers must be registered by the American Hereford Association (AHA) and out of a registered sire and dam.
- Consignors must have a one female consigned to the sale for each steer nominated.
- A maximum of two (2) steers per consignor.
- Nominations are a first come, first served basis.
- Steers will enter the sale ring individually.
- Steers that are not halter broke or broke to the tie, will be grouped together in one paddock for viewing.
- We recommend that the steer is halter broke or broke to tie. If they are halter broke to tie, on Saturday, they will be placed on a Tie Rack for viewing.

Please Note: DNA Testing is NOT required for this group of cattle.

2021 Northeast Elite Hereford Sale DNA and Parentage Requirements

Requirements:

- All cattle (regardless of age) consigned to the sale must be DNA tested for the Genomic Profile. This basic DNA test includes profile, genetic abnormalities, GE-EPDs and parentage.
- The Genetic Profile paired with the MD (Mandibulofacial Dysostosis) test is required if the animal pedigree shows as a potential carrier for MD.

These requirements assure new owners are guaranteed parentage accuracy and cattle are free of any known genetic defect.

Reasons for Testing

- The American Hereford Association (AHA) is dedicated to continually building a powerful genetic evaluation and providing additional reliability to traits of interest for Hereford breeders and their customers.
- Correct parentage allows for the most accurate analysis of the animals in the genetic evaluation. AHA has found that roughly 8% of all registered animals come back with unintentional misidentified parentage.
- The AHA has identified five genetic defects - Hypotrichosis (HY), Dilutor (DL), Idiopathic Epilepsy (IE), Maple Syrup Urine Disease (MSUD) and most recently Mandibulofacial Dysostosis (MD).
- Animals tested with the genomic profile increases the accuracy and reliability of their EPD profile.

Please Note:

- Genetic testing results normally take six (6) weeks.
- The cost of the Genomic Profile is \$42.
- The cost of the Genomic Profile paired with the MD is \$55.
- Ordering Tests – There are two ways to order a DNA sample submission form.
 - If you are MyHerd user, you can order the test online.
 - Both MyHerd users and non-users can contact the AHA customer service staff at (816) 842-3757 with the registration number and request the test(s).

IMPORTANT NOTE: The normal time frame for receiving results from the DNA test is six (6) weeks. Please plan your submission accordingly to assure we have the time necessary to include the results in the catalog. If you need any assistance or guidance in meeting the above requirements, please feel free to contact neelitesale@gmail.com or (518) 945-2638.
